

"Where Quality and Price Meet Since 1969"

---

September 16, 2020

To Whom It May Concern,

Bliss Roofing, Inc. has been shut down since late afternoon Thursday September 10th through September 15th due to the fires in the area. The fires have caused many of our employees to be on Oregon's evacuation zone. As we support our employees through this time, we are not forcing anyone to work unless the area is deemed not hazardous.

The air quality from the fires is also a health concern to all employees considering the work we do outside. We are monitoring the Oregon Air Quality Index daily. We made the difficult decision to close the office today based on the high level of smoke and quality of air and have postponed all roof related activity until we feel it is safe for all of our employees. We hope to be back up and running as soon as possible so we can fulfill your roofing needs.

We appreciate your support and understanding and will work diligently to get back to work as quickly and safely as possible.

We thank you for your patience and thank you for choosing Bliss Roofing.

Sincerely,

Stephanie Baird

Bliss Roofing, Inc.
